 Theme

SUSTAINABILITY: SAVINGS AND INTERNATIONALIZATION

PROJECT PRESENTATION - SCORE

Seville, 20th November 2012

Objectives

The objective of this local information seminar, organized in collaboration with the Programm Eco-Innova of the Chamber of Commerce of Seville, was to inform and educate the locals entrepreneurs about the importance of energy efficiency and sustainability in business.

The seminar also wanted to show to the companies about the incentives that they have when they follow this policies.

The Score project presentation was intended to present reality technologies and systems available to save energy in buildings and the best practices discovered due to the project. Also were showed internationalization opportunities in the field of sustainable construction.

- Sustainability and business internationalization.

Mr. José M^a Vega - Responsible for the project SCORE at the Chamber of Commerce of Seville.

- The SCORE project: objectives, stages and expected results.
- Best practices
- Opportunities to export in the sector of sustainable construction

Conclusion – Open Issues

The importance of sustainability is key to our future. Governments have already taken this path and all the stakeholders must follow them, in particular companies.

This change of attitude has start without any delay and if companies do not take it, they are going to be forced to take it by different regulations with an increasingly intensity.

In addition, sustainability is a great opportunity for local businesses to internationalize. Taking advantage of these aspects will serve to dominate this market that has an increasing demand throughout the world.
